Purpose: Assuring water systems are safe, efficient, sustainable and compliant. Assuring commercial premises are compliant with air quality and environmental regulations.

Recurring service: Assessing, testing, inspecting, dosing, maintaining, monitoring and certifying.

More on pages 31 to 35

About us

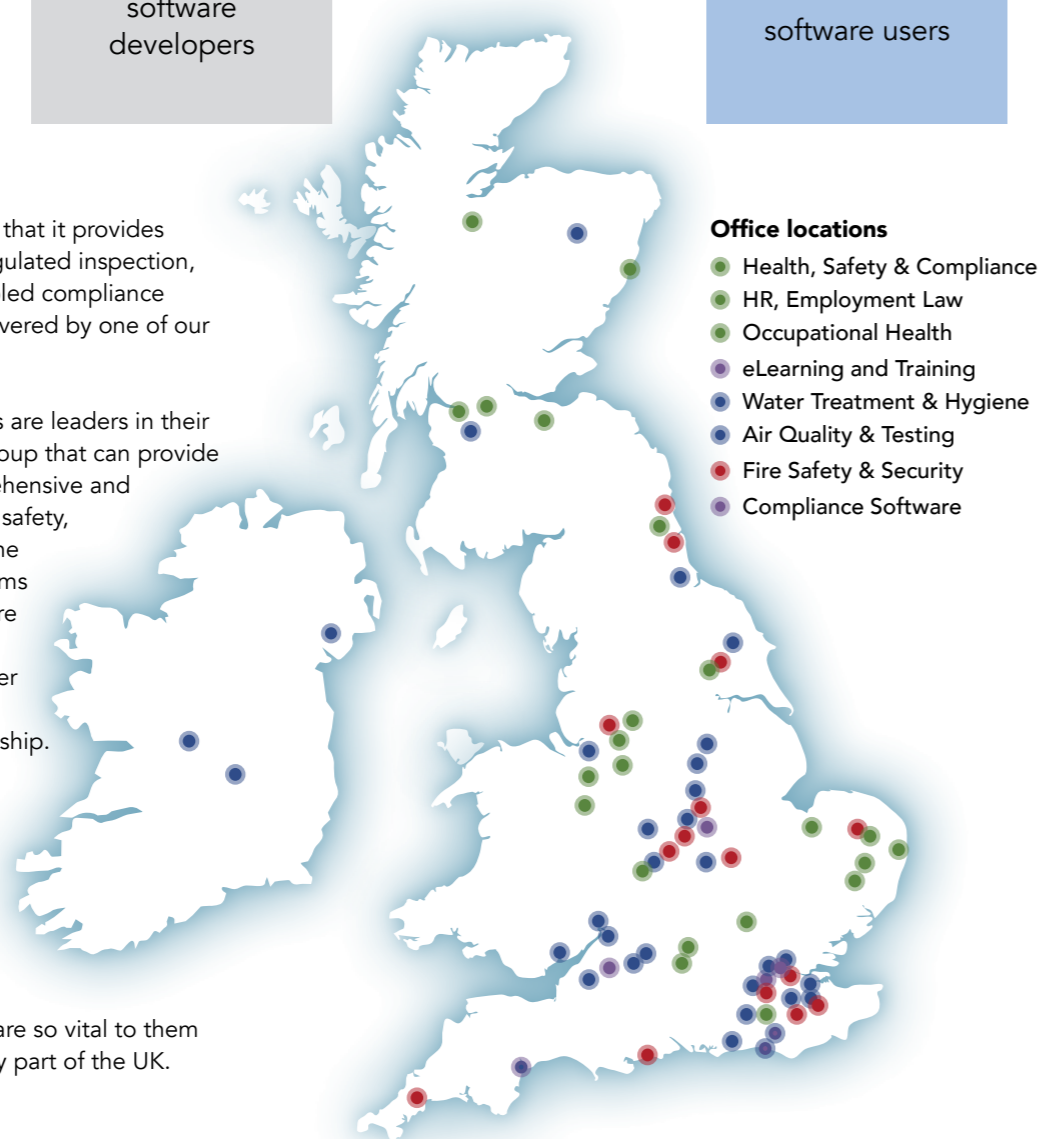

Marlowe is a well-established London Stock Exchange listed company which was formed to build a group of the leading specialists in their field with a vision to become the UK's most trusted name in the provision of regulated safety and compliance services.

Marlowe's unique strength is that it provides a range of closely related regulated inspection, testing and technology-enabled compliance services each of which is delivered by one of our specialist divisions.

Individually, these businesses are leaders in their fields but together form a group that can provide our customers with a comprehensive and integrated approach to their safety, regulatory compliance and the upkeep of the building systems they rely on. That means more convenience, better across the board compliance, greater consistency and the benefits of a trusted in-depth relationship.

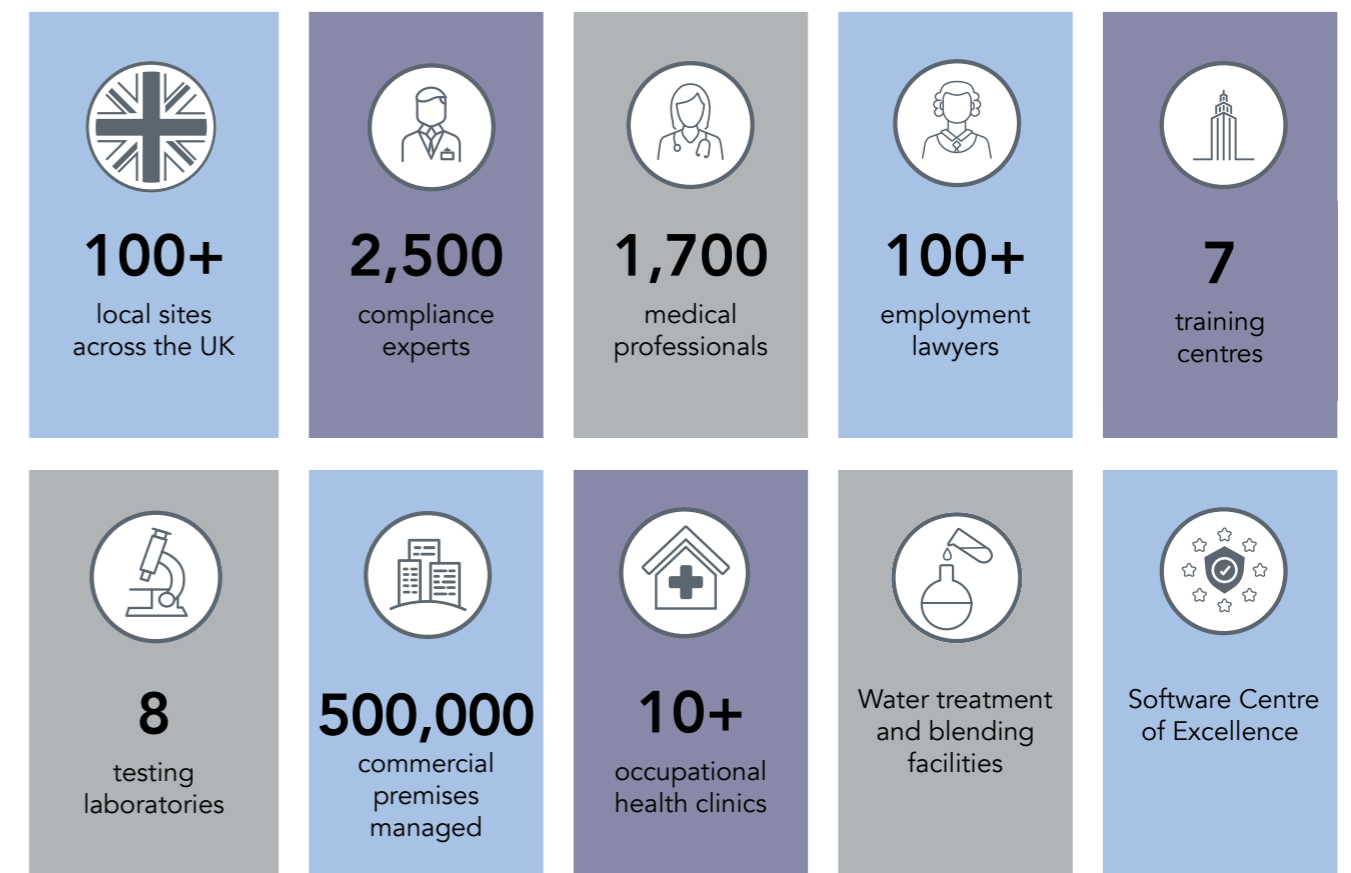

More importantly, our size, range and extensive national footprint gives our customers the peace of mind that comes from knowing that they can rely on Marlowe to deliver those mission critical services that are so vital to them every day of the year in every part of the UK.

Marlowe at a glance

We deliver compliance software and eLearning, health & safety, HR, employment law & occupational health, fire safety & security and water treatment & air hygiene - all of which are vital to the wellbeing of our customers' operations and are invariably governed by stringent regulation.

Our solutions help our clients reduce risk, assure regulatory compliance and achieve total peace of mind.

The Marlowe group consists of a number of leading businesses which provide technology-enabled services across four main regulated safety & compliance sectors.

Marlowe currently employs 4,000+ people across the UK, provides services to approximately 20% of Britain's commercial premises and is increasingly attractive to businesses who want a single outsourced, nationwide, provider of a comprehensive range of regulated health, safety and compliance services. Our software is used by over 1 million users.

Our clients can be found in most office complexes, high streets, leisure facilities, manufacturing plants and industrial estates, and include thousands of SMEs, large corporates, facilities and property management providers, local authorities, NHS trusts and FTSE 100 companies.

The Marlowe business philosophy

Marlowe was formed to create sustainable shareholder value through the growth and development of businesses that provide regulated compliance services.

Our decentralised operating model gives our businesses considerable autonomy within a disciplined and well-defined strategic framework.

Our managers are empowered to make the decisions that they need to grow their businesses in their markets.

Our model seeks to enable our companies to retain the agility of entrepreneurial private businesses whilst providing them with the resources of a much larger listed company, to help them unlock their potential and stewards their rapid growth in a way that ensures that all of the key stakeholders are focused on value creation.

£400m+
run rate revenue

inspected each year

12 year
average
customer length

Over the years we have built a group of tech-enabled service providers that can assure UK organisations are safe, healthy and compliant with regulation.

Marlowe operates in non-discretionary service sectors with robust growth prospects. The majority of our revenues are recurring, predictable and visible. Our businesses benefit from a strong, shared, channel to market which provides us with an intrinsic competitive advantage.

Marlowe's defensive market qualities, organic growth momentum and proven track record of accelerating growth through targeted M&A strongly position us to continue to create sustainable shareholder value.

STRATEGY IN ACTION

Who we work with

End-to-end solutions across a wide spectrum of industries and customers

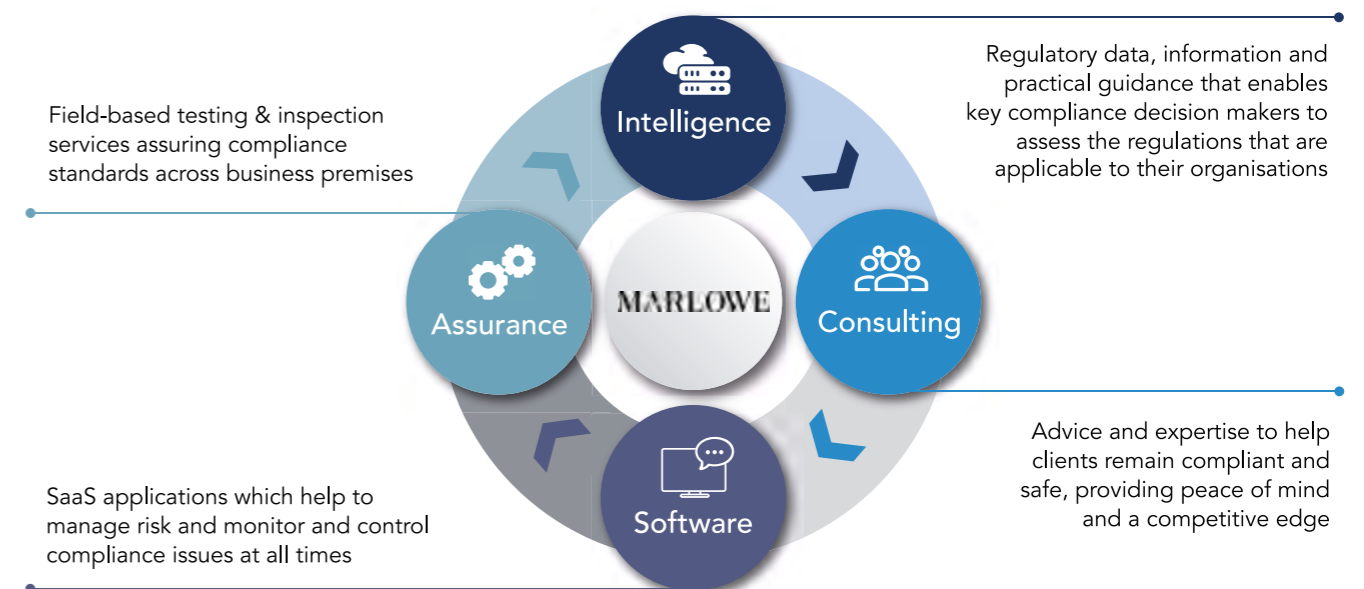

Marlowe provides end-to-end compliance solutions to a broad range of customers ranging from SMEs, schools, doctors' surgeries and food processing sites through to large national organisations, property managers, leading universities, airports and FTSE 100 companies.

Marlowe's end-to-end compliance model

Marlowe can provide the full range of safety and compliance services right from conducting health & safety audits and assessments, HR, occupational health or employment law advice through to testing a water system for bacteria or certifying a fire safety system.

MARLOWE'S VISION: END-TO-END COMPLIANCE CYCLE

Our businesses operate as autonomous sector specialists but are all bound by our common channel to market. Typically, we sell our services to Health & Safety, Risk & Compliance, Facilities or Property Management professionals who are responsible for the safety and compliance of their organisations and the properties they occupy. As a result, we closely understand what these individuals care about and are equipped with the tools to succeed in compliance service markets.

The vast majority of our competition only have the capabilities to provide a single service, usually only in a small region of the UK. We make attaining high standards of safety and compliance achievable for our client through working with them across the whole of the UK and across a number of closely related compliance disciplines. Each of our services is delivered by independent specialist divisions of Marlowe who are leaders in their respective fields in their own right, so our customers know that they are always dealing with experts.

In a typical commercial facility, our end-to-end model means we can implement:

- Our compliance intelligence capability via our software of regulatory data, information & practical guidance enables key compliance decision makers to assess the regulations that are applicable to their organisations.
- Our compliance consulting capability through our consultants & auditors provide advisory services which our clients depend on to help them apply these regulations to their organisations.
- It's then our compliance software capability which through our software applications help to monitor and control all risks.
- This then delivers our compliance assurance capability, a field-based compliance to test and inspect your business premises across areas like fire safety & water hygiene.

Marlowe is in a unique position in the UK of being able to provide this end-to-end safety compliance solution which assures total regulatory compliance.

75%

of property owners cite better data quality and accuracy as key to achieving their strategic real estate goals

Meridian Software: Marlowe's compliance solution

Technology is a central component of our strategy. Compliance software is a key service line that we deliver to our clients and is central to their health & safety strategies.

As our clients' premises continue to digitise, we will continue to invest in software and connected devices to provide real-time visibility of safety and compliance standards and data. Meridian is at the heart of this strategy.

Meridian is our secure cloud-based risk management system that enables proactive, real time management of compliance, with powerful and flexible reporting. It sits at the heart of our approach to risk and compliance technology.

Meridian manages the challenge of disparate systems and vast amounts of compliance data by consolidating this across the

various compliance modules including document and action tracking, online inspections, incident reporting, contractor management to name just a few features. All of our clients compliance data, processes and regulatory obligations can be managed within one system.

Developed and managed in-house by over 25 software developers the system draws data from consultant applications, Marlowe group operating systems, customer record systems, and our consultant audits to present a holistic view of a customer's health and safety compliance status in real-time.

50k properties	25k users	25+ external links	100+ automated reports	4m documents	~2.5m actions	In-house software centre of excellence

Elogbooks: CAFM platform with integrated 24/7 FM service desk

A combined branded 24/7 service desk with a bespoke CAFM system to aid risk mitigation, manage service delivery across your portfolio, and provide total visibility of the supply chain.

Our intuitive, cloud-based software is used across the industry in the UK and Europe (approx. 20,000 sites) by some of the largest Corporate/PLC's in the property and asset management sector.

Elogbooks controls millions of supplier and contractor requests, and presents live statistics to both the supplier and Property Manager, to give total visibility of service delivery.

The service desk and administrators, aid clients in managing/maintaining their system, ensuring that information and integrity of the data is accurate/up to date by pro-actively chasing down tasks.

Utilising Elogbooks as a supplier management system provides 365 day performance measurement, live reporting, and aids in the completion of the supplier audit / risk cycle. Every supplier is integrated with Elogbooks; every interaction is measured, aiding in compliance with contract SLA's, responding to system requests, or uploading certification.

Elogbooks also provides tools to accredit suppliers, track supplier compliance and audit reports for annual review. This ensures the whole supplier life cycle is managed from procurement through to contract termination, and means you get complete visibility of the process.

The system has comprehensive functionality using the latest in technology innovations such as NFC (near field communication), mobile apps, cloud based data management and high availability architecture.

Benefits

- Ensures high levels of accountability and compliance
- Drives improved contractor performance
- Provides complete visibility of the supply chain and building management process
- 24/7 telephone service desk to help manage jobs from start to finish
- Ability to monitor all planned, reactive and quoted works
- Gives full audit trails and asset history

Prosure360:

Giving you full control and visibility of your supply chain.

Prosure360 is an innovative cloud-based supply chain management platform giving organisations total transparency of the contractors and suppliers they work with.

What we do

With supply chains becoming more complex and an increasing focus on achieving high standards and ethical best practices, Prosure360 provides supply chain visibility to easily manage suppliers and contractors, and minimise the impact of vulnerabilities and disruptions. It also helps contractors gain the verifications they need to demonstrate their adherence to health and safety, compliance, relevant legislation and quality standards.

Providing transparency in your supply chain

As a business, when you're looking to select service providers to engage with, you need to be sure that they can do the job safely and without risks. At the same time, increasing legal requirements and expectations from stakeholders mean that you need to show that you're managing your business responsibly.

Prosure360 gives you have all the insights and data you need to make an informed decision on which service providers to work with. It allows you to easily track, manage and capture data and, with this technology-led approach, you control your own selection and approval criteria as well as streamlining your processes to increase efficiency.

Demonstrating credibility and ethical best practice

For suppliers and contractors, Prosure360 helps to demonstrate that you're compliant with all the latest relevant legislation and keep you ahead of the competition. Importantly, with an increasing number of businesses looking to mitigate risks beyond health and safety, you also need to show that you run your business ethically.

Through verification, you can confidently show your customers that you're in control of operational risks across the supply chain and operate to the highest standards in health and safety, quality, ethical best practices, and

responsible growth. You can also save up to £1,500 from our range of membership benefits.

Benefits of Prosure360 to clients

We help businesses find and connect with suppliers and contractors based on a broad range of information, such as health and safety, ethical and environmental practices, and key financial metrics - all in one place.

- Visibility of a wide range of service providers
- Reduced risk of issues occurring within your supply chain
- Ability to set standards and report where standards are not being met
- Pre-qualification and SSIP assessments managed and assessed by the Prosure360 team, reducing your workload in asking procurement and safety questions
- Leading UK verification scheme

Benefits of Prosure360 to service providers

- No more multiple pre-qualification questionnaires
- Provide peace of mind that you're fully compliant with SSIP
- Save time, money and reduce your admin
- Prove your commitment to key standards in health and safety
- Raise the profile of your business, potentially earning new relationships with clients
- Wide range of membership benefits, with the potential to save you money

Barbour:

One place for all your compliance information and guidance

Barbour provides a simplified, all-in-one solution to help you remain compliant with your organisation's diverse range of responsibilities.

Our service brings you regional legislation and guidance from over 800 trusted and official industry sources to help you filter down to what applies to your business.

We know that legislation can be difficult to understand or interpret - so Barbour became a publisher in our own right to help support you. Our in-house experts produce straightforward guidance and legislation summaries published by topic, helping you to understand easily and quickly what is required of you.

The Barbour service also includes legal register templates, how-to guides, training tools and editable documents to help you train your teams and support the business with its responsibilities, saving you valuable administration time.

No other service provides both the legislation and guidance library along with communication tools, enabling us to provide you with a fully comprehensive and unrivalled service.

SAVE TIME

Everything you need to know is all in one place and updated daily for your peace of mind. Filter down easily to what applies to your organisation and cut out unnecessary research and administration time.

STAY COMPLIANT

Ensure your business is fully compliant with the latest legislative updates by receiving immediate alerts.

READY-TO-USE TOOLS

Benefit from a range of editable resources such as ISO gap analysis tools, CPD webinars, Technical Guides that summarise key topics and legislation, and Employee Factsheets to help you communicate with your team.

eLearning and Training

DeltaNet provides a full suite of business compliance and H&S eLearning courses, offering: bespoke/tailored courses, gamified content, a flexible cloud-based app and international translations. It serves businesses of all sizes across the UK and internationally to ensure their employees are trained in and comply with safety, HR and business compliance standards and legislation. Our course library has been further developed by the acquisition of Cylix, the eLearning specialist in equality, diversity & inclusion.

VinciWorks e-learning has trained millions of professionals on their compliance obligations, building a culture of integrity and inclusion. We raise awareness of key regulatory risks such as data privacy, ESG, anti-bribery, tax, modern slavery and ethics.

Tersus Training is a leading nationwide health and safety training provider. Our industry experts have a wealth of health and safety training and consultancy experience across a wide spectrum of industry sectors, which gives us the ability to create programs that will allow you to not only qualify but excel in your profession. Our professional team of trainers and consultants provide a full suite of safety related training courses on both an open-schedule and on-site basis.

WHAT WE DO

Deltanet delivers numerous safety and compliance online courses and personalised learning through filtered content and smart recommendations with Astute, the Learning Experience Platform (LXP).

VinciWorks e-learning offers compliance training relating to ESG, anti-money laundering, GDPR and data protection, anti-bribery, sanctions and more. With hundreds of courses to choose from, our training goes further than simply ticking the compliance box. All of our courses are fully customisable, with the option to change any aspect of the course, from adding a custom module to changing the colours and font within the course in line with your company's branding.

Tersus Training offer over 50 varied industry recognised training courses, professionally delivered by trainers throughout the UK. We also offer a bespoke training service, where the training can be tailored to suit your requirements. We deliver training courses from our dedicated centres located across the country, as well as conducting on-site training, to ensure we can deliver the training when and where you need it.

eLearning and Training

Skill Boosters is the UK's leading provider of video-based training on equality, diversity and inclusion, leadership, communication, personal effectiveness and workplace well-being. We collaborate with leading specialists and industry leaders to produce cutting-edge learning solutions that combine expert analysis with original drama, lived-experience stories and inspirational case studies.

EssentialSkillz were founded in Galway (Ireland) in 2001 by husband and wife team, Tony & Michelle Dervan. Tony had worked on multi-million dollar eLearning projects for Microsoft Interactive Press and Michelle was an experienced classroom teacher. Galway is still home to EssentialSkillz and is supported today by customer-facing offices in Chester (UK) and Delaware (USA).

We are extremely proud of the quality of our secure online compliance products and the services we provide. We work hard every day to ensure we deliver excellent value to our customers. As good as we believe our product to be, it is our award winning after-sales support that differentiates us in the market.

WHAT WE DO

Skill Boosters – in addition to our extensive range of off-the-shelf courses, our online resource centre offers a huge range of flexible video content to support blended learning solutions for both online and in-person training, supporting dynamic and inclusive leadership and enabling happy, productive and successful teams.

EssentialSkillz – in addition to our extensive range of current and annually third-party certified off-the-shelf courses, our authoring software enables you to tweak our courses or write your own to meet your specific needs. All of this is wrapped up in our online compliance platform that enables you to automatically roll out and manage compliance training, risk assessments and policies for signoff to your staff.

And if you already have a compliance platform or learning management system, we can provide risk assessments and courses editable by you for deployment through your preferred system. So you can have the best content in the platform you prefer.

H&S, HR and Employment Law

We provide compliance service to organisations of all sizes; giving our customers the peace of mind that their organisations are compliant with the latest Employment Law, HR, and Health & Safety legislation.

Over the course of this year, a number of our current Marlowe businesses will be coming together to form a coordinated Governance, Risk and Compliance (GRC) proposition. Employing over 300 colleagues, we exist because when employers are compliant, confident and risk-aware – and their employees are safe, supported and encouraged – an organisation has the peace of mind to concentrate on innovating and growing, while attracting and retaining the best people.

WHAT WE DO

As the leading single source of highly qualified in-person advice and comprehensive digital services, we empower our clients to manage all their employment, safety and wellbeing challenges. Our specialist support dispels anxieties around those sensitive issues that can damage a client's reputation and commercial performance. It's our unique blend of local knowledge and UK coverage that gives us a distinct advantage in understanding our client's organisation. Commercially-aware, technology-enabled and future-ready, our pragmatic, proactive and personalised services help employers navigate the fundamental aspects of working life - creating great places to work.

600,000

businesses were
victims of
crime last year

Compliance. Assured.

Security Systems

We protect our customers with tailor made security systems that are developed to respond to their unique requirements.

Over the years criminal behaviour has changed as they adopt new technology to circumvent conventional methods of protection. We recognise that our methods must change to respond to this.

We have evolved – keeping pace with the latest innovations and developments in crime prevention technology to keep our customers safe and secure in today’s world.

WHAT WE DO

We offer a total turnkey solution from initial design and product selection through to installation and commissioning. Our national coverage and Alarm and Video Receiving and Innovation Centre enables us to provide our customers with an ongoing 24/7 maintenance and monitoring solution.

You can relax in the knowledge that your premises are being vigilantly protected against unlawful entry with our security systems.

Remote Monitoring & Connected Services

Operating 24/7, 365 days a year through the latest communications technologies, our Category II NSI Gold Standard BS5979 accredited Alarm and Video Receiving Centre, Marlowe Connect provides monitoring solutions that can help you provide a safe and crime free environment.

Within our Technical Innovation Centre, Marlowe Connect works with our account management team and customers to develop tailor made, technically innovative security solutions that exceed our customers' expectations.

WHAT WE DO

Marlowe Connect continually monitors all alarm signals and reacts in the event of an activation, giving you peace of mind that your business is always protected day and night, with the emergency services on hand much faster to save lives, assets and buildings.

Our manned 24/7 technical support desk provides remote diagnostics, maintenance and remote repair solutions minimising the need and cost of an on site engineer.

Our Water Treatment & Hygiene division works with **38%** of all NHS hospital trusts in the UK

Compliance. Assured.

Water Treatment & Hygiene Services

We deliver safe, efficient and compliant Water Treatment, Hygiene and Wastewater Treatment services across the UK.

As trusted partners, we support our customers in meeting their legislative requirements and sustainability goals, such as reducing usage of water, chemicals and energy to improve operational efficiency.

Treatment technologies and chemical supply solutions are tailored to site-specific need and backed up by our service and maintenance plans – all underpinned by engineering expertise across the group.

WHAT WE DO

Water treatment and hygiene

Our water hygiene services enable expert water management, water quality, water hygiene risk assessment and L8 legionella compliance, supporting industrial process water, recreation such as pools and spas, cooling towers and evaporative condensers, closed water systems and potable water.

We deliver UKAS accredited legionella testing, laboratory analysis and training to ACoP L8 and HSG 274, closed heating and cooling systems to BSRIA BG50 and BG29, safe water in healthcare premises to HTM04 and swimming pool guidelines to PWTAG.

Wastewater treatment

On the sewage and industrial effluent side, our technical team include treatment and dewatering specialists to ensure the quality of flows recycled into the environment, in compliance with environmental permits.

We collaborate closely with our clients, which include highly regulated water utilities, to identify the optimal whole lifecycle and futureproofed solution for each site, whether new build, asset replacement or repurposing existing infrastructure.

Our wastewater accreditations include: ISO 45001, 14001, 9001 and CHAS

Ventilation Hygiene

Combined, WCS Ductclean and Hydro X Air are the UK's leading Ventilation Hygiene specialists.

We ensure that your systems are safe, healthy and compliant and that your sites are appropriately maintained by carrying out essential ventilation, ductwork and kitchen extract cleaning and management.

Unmaintained ducting systems are one of the primary causes of fires and the spread of fire throughout buildings (compliance is governed by Section 17 of the Fire Safety Regulatory Reform Order).

Unhygienic ducting and ventilation systems lead to poor air quality which does not comply with TR19 causing harm to the health and wellbeing of a buildings occupants.

We are the UK's leading specialist in fire damper testing, inspections and maintenance, in accordance with BS 9999:2017.

We can also supply high-tech ductwork deposit monitoring system reducing site visits and allowing real time monitoring of your ducted systems.

WHAT WE DO

Our BESA accredited technicians are trained in-house at our state of the art training centre to implement a compliance service which ensures that your ventilation systems are safe, clean and compliant, that your fire and smoke dampers are operating in line with regulation and the air quality in your premises conforms with TR19 standards.

Key Services

The Health and Safety Executive estimates that there are **5,000** asbestos-related deaths per annum in the UK

Asbestos Consultancy

We deliver a fully comprehensive range of specialist consultancy services which enable duty holders to comply with the Control of Asbestos Regulations 2012 and the Construction (Design and Management) Regulations 2015.

With 35 years of experience, 360 specialists employed nationwide, UKAS accredited testing and inspection services, 10 offices and 6 site based offices, 12 permanent laboratories and mobile laboratory facilities, we provide a single solution for asbestos management compliance across all sectors in the UK.

WHAT WE DO

We prevent harm to people, property and the environment through the delivery of specialist services for each stage of your asbestos compliance journey. From initial inspection and analysis to identify asbestos which may be present, to the provision of advice and the development of your management plan, through to training, the project management of HSE licensed asbestos removal and provision of all of the legal documentation required to comply with CAR 2012 and CDM 2015, we provide all of the services you need in order to fulfil your legal duties.

Our customers can view their asbestos data, survey reports, certificates, management plans, training records and compliance overview using the online TEAMS portal. This provides real-time information across the entire property portfolio, whether it's a university campus, hospital, domestic property, commercial outlet, factory or a nuclear power station.
